

## Bibliometric Analysis of Open Access Journals in Mathematics Indexed in DOAJ Database

*Jatinder Kumar\**

Department of Library, Baddi University of Emerging Sciences & Technology, Baddi, Solan, Himachal Pradesh, India

### *Abstract*

*The article reports the findings of bibliometric analysis of open access journals available in the subject of 'Mathematics' indexed in directory of open access journals (DOAJ). The bibliometric attributes used are; journals with subject heading 'mathematics', country of publication, language used in journals, publisher of journals, co-relation of mathematical journals with other subject fields, peer review policy, archiving policy, security and standard features followed by journals. Total 556 journals in mathematics are analyzed in the study. Some of findings of the study are; maximum journals in mathematics are indexed under 'science' subject heading; maximum number of journals were added in year 2013, maximum number of journals are published in 'print' format; Hindawi Publishing Corporation has the largest collection of journals in mathematics, India is leading contributor for mathematical journals; 'Portico' is the major archiving agency; and maximum journals indexed in DOAJ do not have any processing charges for the publication of articles.*

*Keywords:* Directory of open access journals (DOAJ), mathematical journals, bibliometric analysis, open access journals in mathematics

### **INTRODUCTION**

The study of scientific literature is foremost component of academic and industrial research, teaching and learning. The information explosion and revolution in information technology has built the platform for publishers, organizations, academic institutions and researchers to showcase their research output in the form of open access journals and articles. The open access literature published in journals, supplements and compliments the scientific literature available in archives and currently published printed journals. The ever increasing subscription cost of print and online journals has forced scientific community to move towards less expensive or open access journals for getting their monographs published.

The open access journals not only give ease to researchers but also relieve the financial pressure on the libraries. Open access journal can also reduce the cost structure of the entire scholarly publishing enterprise [1]. The open access (OA) has brought in a welcome change

and opened-up new avenues for scholarly publishing and access models [2]. Open access journals (As called the GOLD road to open access) are one of the two general methods for providing open access. The other one (As called the GREEN ROAD) is self-archiving in a repository [3]. Open access (OA) to information and knowledge is an innovative mode of scholarly communication within the digital environment aimed at achievement of universal access to information and knowledge [4].

The director of open access journals (DOAJ) is a significant platform built for the research professionals in the field of research and development. It provides access to significant scientific and scholarly open access journals covering nearly all subject fields of human knowledge. The directory is an initiative of Lund University, Sweden and based on the Budapest open access initiative program [5]. The directory of open access journals was launched in 2003 at Lund University, Sweden, with 300 open access journals, and today

contains more than 10000 open access journals covering all areas of science, technology, medicine, social science and humanities. Directory of open access journals (DOAJ) is a service that indexes high quality, peer-reviewed open access research journals, periodicals and their articles' metadata. The directory aims to be comprehensive and cover all open access academic journals that use an appropriate quality control system and is not limited to particular languages or subject areas. (<https://doaj.org/about>) [6].

Bibliometrics is a type of method used to quantitatively analyze the research output of individuals, research publications, publishers or organizations. Bibliometric methods are being used in every subject field to find out recent trends in research and development, to know the productivity of authors and organizations and also to find the inter-discipline relationships. Bibliometric study is done on the basis of some attributes to evaluate research output. The main attributes used for bibliometric study are: publication counts, citation counts, co-citation analysis, co-word analysis, scientific 'mapping' and citations in patents. The current article is a bibliometric study of all journals in the field of mathematics indexed in DOAJ database.

## DIRECTORY OF OPEN ACCESS JOURNALS

It was firstly discussed during the Nordic conference on scholarly communication in Lund/Copenhagen [7], that a comprehensive directory of open access journals is to be made for research community and academicians. With the available technology and resources it was possible for libraries and information centers to work towards the conference goal. The Lund University, Sweden made a platform called DOAJ (Directory of Open Access Journals) and urged libraries, information centers, organizations, academic institutions, individuals and people in academia to come forward with their research publications to be integrated in the existing services of DOAJ.

Directory of open access journals is a significant service being offered to research community that provides access to quality open access journals, covering major knowledge fields. DOAJ is created keeping in view the information needs of scientific community. It also aims to strengthen the ease of use of open access scholarly literature published in journals, thereby promoting the usage of and impact of open access journals.

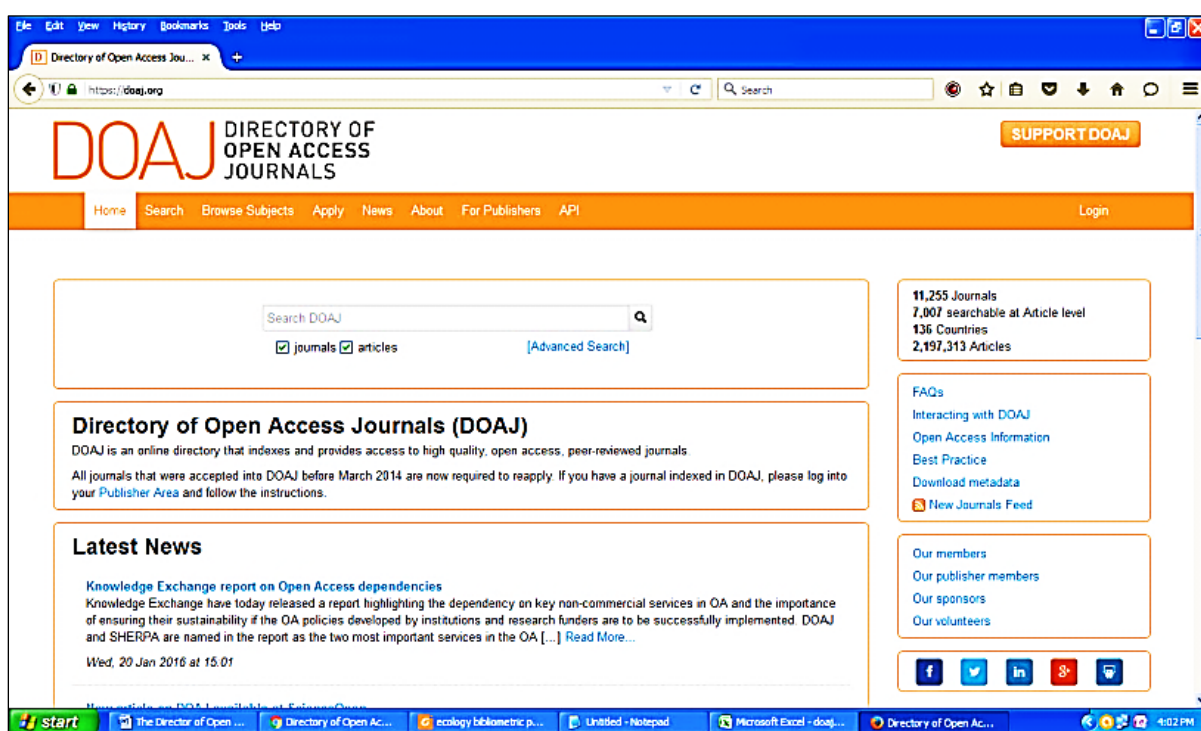

Fig. 1: Directory of Open Access Journals.

The directory of open access journals aims to be comprehensive and cover all open access scientific and scholarly journals that use a quality control system to guarantee the content [8]. Directory of open access journals is hosted, maintained and partly funded by Lund University libraries head office.

“DOAJ is the most recognized and most authoritative list of scholarly, peer-reviewed, fully open access journals. More than 10 percent of the world’s peer-reviewed journals are now included in DOAJ, making DOAJ among the world’s largest collections of peer-reviewed scholarly journals, period. There are more peer-reviewed journals in DOAJ than Science Direct” [9]. “The DOAJ vetting process involves querying journal editors to ensure that peer review or equivalent quality controls are in place and that journals meet the criterion of true open access per the Budapest open access initiative definition” [10]. Having an ISSN is the mandatory requirement for any journal to get enlisted in DOAJ database. Journal indexed under DOAJ go through periodic review process to ensure that the journal continues to meet the criteria for inclusion (Figure 1).

### OBJECTIVES OF THE STUDY

The article has certain underlined objectives;

- To find out open access journals in mathematics indexed in DOAJ;

- To ascertain top ten journal publishing countries;
- To list top ten publishers of journals;
- To know the prominent languages used in journals;
- To look into the archival policy of the journals;
- To observe the co-relation of journals with other subject domains.

### RESEARCH METHODOLOGY

The article attempts to present a bibliographical study of journals in mathematics indexed in the directory of open access journals (DOAJ) platform. The study analyzed 556 journals on basis of some bibliometric attributes such as; publisher, country of publication, language of text, subject heading based distributions, interdisciplinary subject field, peer review and archiving policy. The analysis is shown with help of tables and graphs [11].

### ANALYSIS AND INTERPRETATIONS

The search with a keyword ‘Mathematics’ on DAOJ database, fetched a collection of 556 indexed journals. It is understood from the search results that journals on mathematic (Subject) are indexed under broad knowledge domains such as; science, social science and technology. Table 1 enumerates the free open access journals on mathematics with their ISSN numbers, URLs, and subject headings.

**Table 1:** List of Open Access Journals in Mathematics Indexed in DOAJ.

**Table 2: Year-Wise Distribution of Journals in Mathematics.**

Year	No. of Journals Added to DOAJ	Percentage	Cumulative No. of Journals	Cumulative Percentage
2002	2	0.36	2	0.36
2003	36	6.47	38	6.83
2004	16	2.87	54	9.71
2005	25	4.49	79	14.20
2006	23	4.13	102	18.34
2007	21	3.77	123	22.12
2008	21	3.77	144	25.89
2009	30	5.39	174	31.29
2010	82	14.74	256	46.04
2011	65	11.69	321	57.73
2012	62	11.15	383	68.88
2013	119	21.40	502	90.28
2014	12	2.15	514	92.44
2015	34	6.11	548	98.56
2016	8	1.43	<b>556</b>	<b>100%</b>

**Graph 1: Year-Wise Distribution of Journals in Mathematics.**

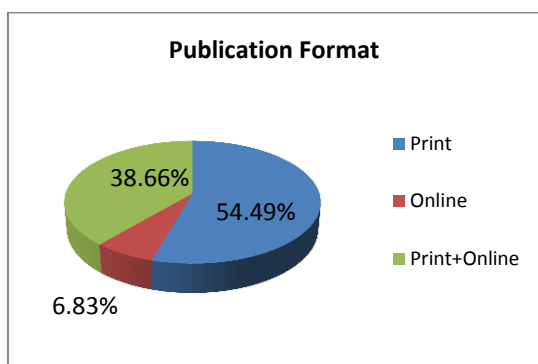

Table 1 above enlists the journals fall under the subject heading of ‘mathematics’. This has been observed that mathematics has correlation with other subject domains like sciences, social sciences, technology, engineering and even humanities.

Table 2 and Graph 1 above display that maximum numbers of journals in mathematics (119) were added in the year 2013 gaining a percentage of 21.40 from the preceding year. 82 journals were added in year 2010 with a percentage of 14.74 and 65 (11.69%) journals were added in year 2011. Surprisingly, there is a steep downfall in the yearly addition of journal after 2013. The data is taken till February 2016.

**Table 3: Publication Format of the Journals in Mathematics.**

Publication Format	No. of Journals	Percentage
Print	303	54.49
Online	38	6.83
Print+Online	215	38.66
	<b>556</b>	100%

Table 3 and Graph 2 demonstrate the publication format of journals indexed in DOAJ. It is found that 303 (54.49%) journals in ‘print format’ are indexed and archived in the directory. Whereas, 215 (38.66%) journals indexed are in print as well as in electronic format. Only 38 (6.83%) journals are in electronic format indexed in DOAJ database.

**Graph 2: Publication Format of the Journals in Mathematics.**

Table 4 above shows that maximum numbers of journals (43) are being published by Hindawi Publishing Corporation, followed by Academy and Industry Research Collaboration

Center (22), Springer (21) and De Gruyter Ope (14) respectively. Some other publishers also have good numbers of journals indexed in DOAJ. But it is clear from tabled data that Hindawi Publication Corporation is the biggest publisher and supporter of Open Access scholarly literature and doing well in promoting research activities with free and open contents.

**Table 4: Top Ten Publishers of Journals in Mathematics.**

Name of Publisher	No. of Journals
Hindawi Publishing Corporation	43
Academy & Industry Research Collaboration Center (AIRCC)	22
Springer	21
De Gruyter Ope	14
SERSC	8
MECS Publisher	6
MDPI AG	6
Science Publishing Corporation	5
Islamic Azad University	4
Institute of Mathematical Statistics	4

**Table 5: Top Ten Countries with Maximum Number of Journals on Mathematics.**

Country Name	No. of Journals	Rank
India	75	1
United States	55	2
Egypt	47	3
Germany	40	4
Romania	27	5
Poland	22	6
Iran	17	7
Indonesia	15	8
United Kingdom	14	9
Spain	13	10

Table 5 represents top ten countries with maximum number of journals in mathematics. India is leading contributor with 75 publications in mathematics indexed in DOAJ database, United States has 2nd rank with 55 journals and Egypt is at 3rd rank with 47 journals. Some other countries also have due share of contributions. The result in this table is quite fascinating, as maximum contributions in the field of mathematics originate from Asian countries.

**Table 6: Top Ten Languages Used in the Journals of Mathematics.**

Language of Publications	No. of Journals	Rank
English	433	1
Spanish	19	2
French	19	2
Russian	12	3
Portuguese	12	3
German	9	4
Ukrainian	6	5
Italian	5	6
Indonesian	5	6
Spanish, Castilian	3	7

Here, we can submit an observance that 'maximum numbers of publications are coming up from developing countries', and that is a good sign of research activities being carried out in this part of the world.

Table 6 explains the language-wise distribution of journals in mathematics. Top ten results are taken to show the trends in language of text of journals. It is clear from the table that 'English' is prominent and preferred language of text being published in 433 journals. Rest of the languages such as Spanish (19), French (19), Russian (12), Portuguese (12) and others relatively have very less number of publications.

**Table 7: Distribution of Journals on the Basis of Subject Headings.**

Subject Heading	No. of Journals	Percentage
Education	14	2.51
Fine arts	2	0.35
Language	1	0.17
Medicine	2	0.35
Philosophy	1	0.17
Science	520	93.52
Social Science	5	0.89
Technology	11	1.97
	<b>556</b>	<b>100%</b>

Table 7 shows the analysis of distribution of journals on the basis of subject headings. The figures in table represent that majority of the journals (520) in mathematics are published under the 'Science' subject heading.

**Table 8: Interdisciplinary Scope of Mathematics Journals.**

Interdisciplinary Subject Field	No. of Journals
Science	489
Electronics and Computer Sc.	270
Instruments and Machines	267
Probabilities, Mathematical statistics	25
Technology	16
Education	16
Social Science	10
Electrical, Electronics. Nuclear Engineering	9
Special aspects of education	7

Table 8 above demonstrates interdisciplinary scope of mathematics journals indexed under DOAJ. It is found 489 journals in science discipline covers or co-relates with mathematic subject domain. Electronics, computer science (270) and instruments and machines (267) journals have also indexed mathematics as one of the disciplines in their subject heading. Besides, some other subjects like technology, education, social sciences, engineering, etc. have shown mathematics as one of the interdisciplinary subject domain. It is found that mathematics is an interdisciplinary subject with wider application in nearly all fields of knowledge.

**Table 9: Archiving Policy of Journals in Mathematics.**

Interdisciplinary Subject Field	No. of Journals
Portico	50
LOCKSS	34
A national library	16
CLOCKSS	12

Table 9 shows the archiving policy of journals in mathematics. The DOAJ database shows that 'Portico' archiving service covers 50 scholarly open access publications in mathematics available in electronic or digitized format. Similarly 'LOCKSS' archives 34 mathematical journals that are indexed by DOAJ. Some other organizations like 'A National Library' and 'CLOCKSS' preserve 16 and 12 methodical journals respectively. It is pertinent to say that with significant development in information technology, various organizations and

institutions have started taking initiative for long-term preservation and conservation of text published in open access journals.

**Table 10: Review System Pattern of Journals in Mathematics.**

Review System	No. of Journals	Percentage
Blind Peer Review	52	9.35
Peer Review	18	3.23
Double blind peer review	9	1.61
No review system	477	85.79

Table 10 represents the review system pattern of journals. 477 (85.79%) journals follow no review system or information is not given about the review system. There are 52 (9.35%) blind peer review journals followed by 18 (3.23%) peer review and 9 (1.61%) double blind peer review journals respectively indexed in DOAJ database. The pattern of review system is duly mentioned against the names of the journals.

**Table 11: Article Processing Fee.**

Article Processing Fee	No. of Journals	Percentage
No	517	92.98
Yes	39	7.01
	<b>557</b>	<b>100%</b>

Table 11 above shows that 517 (92.98%) journals do not charge any processing fee; whereas, 39 (7.01%) journals charge article processing fee from authors. The journals, without publication processing fee are in a way motivating researchers to contribute their research finding without worrying about publication charges.

It is a good way to support research activities and further creating a platform for researchers to showcase their research findings.

**Table 12: Journals with DOAJ Seal.**

DOAJ Seal	No. of Journals	Percentage
No	548	98.56
Yes	8	1.43
	<b>556</b>	<b>100%</b>

Table 12 depicts that only 8 (1.43%) journals bear the DOAJ Seal and 548 (98.56%) journals are without DOAJ seal. The DOAJ seal is a mark of certification for open access journals, awarded by DOAJ to journals that achieve a high level of openness, adhere to best practice and high publishing standards [12].

## FINDINGS AND DISCUSSIONS

The current article has attempted to conduct a bibliometric study of open access journals in 'Mathematics' indexed in DOAJ database. The following findings are reported after the tabulation, analysis and evaluation of retrieved data;

- The director of open access journal is growing database of research publications in various fields of knowledge. The collection of journals is getting bigger and bigger in every succeeding year. Same trend is observed in the subject of Mathematics too. It is reported that since 2002 (inception of DOAJ) maximum numbers of journals in mathematics (119) were added in the year 2013. Presently, there are 556 journals in mathematics indexed in DOAJ database.
- There are many print journals being published by various publishers and organization which are not indexed and preserved by any means. Hence, DOAJ has taken an initiative to index print as well as research publications in electronic format. In case of mathematics, DOAJ database currently indexes and preserves 303 journals in print format, 215 journals in print and electronic format, and 38 journals in electronic format.
- This has been observed in the study that the strength of publishers with free and open contents is increasing steadily. In current study, it is found that DOAJ indexes 43 open access journals published by Hindawi Publishing Corporation, 11 publications of Academy & Industry Research Collaboration Center's, 21 journals of Springer and 14 open access journals of De Gruyter Ope.
- Another amazing finding of the study is that maximum open access journals originate from developing countries; especially Asian countries build the

biggest collection of open access journals in DOAJ database. In case of mathematics, 75 journals published in India are indexed in DOAJ, followed by 55 journals of US and 47 journals of Egypt.

- It is found that being universal language, 'English' is preferred text language of maximum open access journals. The journals scripted in other languages like Spanish, Russian, French etc. are relatively less in numbers.
- It is reported that 520 mathematical journals are indexed under science 'subject heading'. It is understood that mathematics is one of the core branches of pure sciences that make it eligible to get listed in the 'Science' subject heading.
- The journals in various other subject fields like sciences, computer science, electronics and electrical engineering, instruments and machines, education, medicines, social sciences etc. have shown mathematics as one of the subject headings making it interdisciplinary subject domain.
- The study found that that 'Portico' archiving service preserves 50 open access journals available in electronic or digitized format. Similarly 'LOCKSS' archives 34 mathematical journals that are indexed by DOAJ. Some other organizations are also listed by DOAJ that archive open access journals.
- It is found that there are 52 blind peer review journals followed by 18 peer review and 9 double blind peer review journals respectively indexed in DOAJ database. The review system pattern is duly mentioned against the names of the journals.
- Another finding is that 477 journals do not follow any review system or no information is given about their review system which demotivates researchers to submit their work to the journals.
- In case of mathematics, 517 publications do not charge any publication processing fee from authors. Such practices encourage scientists and researchers to contribute their research findings without taking care of publication processing charges.
- It is revealed in the study that maximum journals (548) in mathematics are without

DOAJ seal and only 8 journals have got the desired DOAJ seal, which is acknowledged as mark of certification and high publishing standards.

## CONCLUSION

The directory of open access journals is one of the vital and developing databases of open access research journals that reports research findings of the scientific literature being published around the world by established publishers and organizations. DOAJ motivates research community to contribute their research findings in some of the most authoritative peer-reviewed open access journals. The current article has conducted a bibliometric study of open access journals in 'Mathematics' indexed in DAOJ. The study shows some impressive outcomes and further submits that DOAJ database can be compared with any other commercial database. The DOAJ database houses big collection of journals and has huge usage. It is recommended that the DOAJ database must be included in online collections of libraries, consortia and library networks. Librarians should also market DOAJ contents to library community and advised to hold special training programs for students and faculty members for the awareness and right usage of DOAJ database.
